Guaranteed To Meet Optimal Productivity Requirements on Your Building Development Project

Our Management Concepts and Proven Technical Skills Ensure Clients Achieve Outstanding Design, Engineering and Construction Solutions

Because of the many processes involved, managing a building project can become a very complex task.

By bringing together new management concepts and proven technical skills under the umbrella of **Total Project Services**, we can ensure that a new Development Project meets all the criteria for local Authority Provisions, Design & Documentation, Structural Certification and Construction.

Total Project Services will optimise the Building Development Process and improve the overall performance and delivery of your project.

The Company Offers Capabilities & Services in:

- Project Management
- Building Design
- Town Planning & Building Permits
- Structural Engineering & Certification
- Cost Planning & Estimating
- Contract Documentation & Administration
- Construction Management

Please call for a Free Consultation & Evaluation of Your Proposed Development.

We'll be happy to discuss your needs at a time most convenient to you at no charge or obligation.
